

Kendlebell
The Perfect Answer

outbound calling

“ The Kendlebell team are busy selling my services, when I’m busy in the studio. Perfect. ”

“Kendlebell has been handling my inbound calls now for almost two years. In addition, they follow-up on enquiries whether that be from email enquiries or voicemail messages left outside office hours. The benefits of using Kendlebell's extra services means I have the equivalent of an admin assistant without having to employ staff or worry about holidays and sickness. My business has grown as a result and I honestly don't know how I would manage without them. For my business Kendlebell has a 100% conversion on all outbound calls and notify me of each call made at the end of the day. If they are unable to make contact on the first attempt they follow-up until contact is made.”

LighterLife

outbound calling

Kendlebell not only answer calls, we can make various types of outbound calls too.

More and more Kendlebell customers are asking us to make calls on their behalf. Having got to know our customers and their customers through our telephone answering service it is a simple step for us to take to start making outbound calls on your behalf as well. The kind of calls we can make might include:

- Appointment making
- After sales service calls
- Database cleansing
- Direct mail follow-up
- Follow up of recent sales enquiries
- Market research
- Customer Feedback calls
- Product recalls
- Simple debt chasing calls
- Confirmation of attendance at seminars, shows or events

It is far more cost effective to ensure you keep your present customers happy than to be constantly having to replace disaffected customers with new ones. It is also easier to generate more business from your current customer base than anywhere else. We can help you do this.

There are a range of flexible tariffs to suit all budgets. Get in touch for more info.
