

Kendlebell
The Perfect Answer

telephone answering

“Using Kendlebell has given us precious time back to complete urgent projects and presentations, free from distractions”

“ I own a busy graphic design studio, and as much as I want the phones to keep on ringing, it can be a huge distraction if we're working to tight deadlines.

Our team of dedicated girls answer all our calls when we need them to; giving us the time we need to complete urgent projects.

We've also discovered we gain more new business because there is always a friendly voice on the other end of the line rather than an answer machine which people would avoid. ”

telephone answering

How quickly can you respond to a new enquiry? And how many are you missing?

For most companies, working on a small scale, cost is the central issue. Kendlebell can provide a simple and very cost effective solution, providing customers with their own team of dedicated personal assistants.

All your calls are answered by your own PA, giving you peace of mind that you'll never miss another new enquiry again. Kendlebell is a personal service; your clients hear a friendly human voice on the line, and not an answer machine.

The system at our offices immediately identifies who the call is for and allows the PA to give out helpful information or answer general enquiries on your behalf as if they were actually members of your staff.

All of this costs a fraction of the price of employing staff, involves no administration and gives an excellent first impression to the caller. Messages are passed to you instantly by either text-to-mobile, fax or e-mail or you can phone in and speak to your PA anytime. At the end of each working day we can also send you a fax or email logging ALL your messages taken that day.

Starting at just €50+VAT per month, there are a range of flexible tariffs to suit all budgets.
